

		LHS		
LHS=RHS		unbound, attributeless variable	unbound and attributed variable	non-variable (attributeless)
RHS	unbound, attributeless variable	Unification where attributes are not involved	The hook is not called but the resulting “fused hole” has the attribute value of LHS	Unification where attributes are not involved
	unbound and attributed variable	The hook is not called but the resulting “fused hole” has the attribute value of RHS	attr_unify_hook(ATTV,PUV) is called with: ATTV : attribute value of RHS PUV : fused hole with attribute value of LHS	attr_unify_hook(ATTV,PUV) is called with: ATTV : attribute value of RHS PUV : the LHS nonvar
	non-variable (attributeless)	Unification where attributes are not involved	attr_unify_hook(ATTV,PUV) is called with: ATTV : attribute value of LHS PUV : the RHS nonvar	Unification where attributes are not involved
